Red Hat Summit

May 10–11, 2022

Red Hat Summit – Public Sector Watch Party

Red Hat Summit is quickly approaching and we are excited to host colleagues in Boston. But, if you are unable to attend in-person, we will be streaming keynotes and Public Sector-specific content in our Tysons Corner office. I'd like to invite you to join us during the two-day event, May 10–11.

Join us and learn how Red Hat can help your agency innovate while meeting regulatory requirements and reducing risk. Besides watching the Summit content together, we will have Demos-on-Demand and Ask-the-Expert sessions.
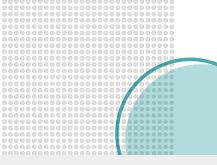

Featured public sector sessions include:
- Operationalization of machine learning at the Department of Veterans Affairs
- Deliver care anywhere with edge computing and AI automation

Speaker Highlights:
- Ken Bailey, Section Chief for Capabilities, Data, and Integration, DHS
- Angela Icaza, Senior Nurse Consultant, DHA
- Shane Mcnamee, MD, Chief Medical Information Officer, Smile CDR
- Amanda Purnell, Director of Data and Analytics Innovation, VA

Join to share your present. Leave to shape your future.

Red Hat Summit is the premier enterprise open source event for IT professionals to learn, collaborate, and innovate on technologies from the datacenter and public cloud to the edge and beyond.
